Material Safety Data Sheet

Acetylene

Section 1. Chemical product and company identification

Product Name : Acetylene

Supplier : AIRGAS INC., on behalf of its subsidiaries

259 North Radnor-Chester Road

Suite 100

Radnor, PA 19087-5283

1-610-687-5253

Product use : Synthetic/Analytical chemistry.

MSDS# : 001001 Date of : 4/11/2005.

Preparation/Revision

In case of emergency : 1-800-949-7937

Section 2. Composition, Information on Ingredients

Name CAS number % Volume Exposure limits

Acetylene 74-86-2 100 **NIOSH REL (United States, 6/2001).**

CEIL: 2662 mg/m³ Form: All forms CEIL: 2500 ppm Form: All forms

Section 3. Hazards identification

Physical state : Gas.

Emergency overview: Warning!

FLAMMABLE GAS.

CONTENTS UNDER PRESSURE.

CAUSES DAMAGE TO THE FOLLOWING ORGANS: RESPIRATORY TRACT.

CENTRAL NERVOUS SYSTEM. VAPOR MAY CAUSE FLASH FIRE.

Keep away from heat, sparks and flame. Do not puncture or incinerate container. Keep

container closed. Use only with adequate ventilation.

Contact with rapidly expanding gases can cause frostbite.

Routes of entry : Inhalation

Potential acute health effects

Eyes : No known significant effects or critical hazards.Skin : No known significant effects or critical hazards.

Inhalation : Acts as a simple asphyxiant.

Ingestion : Ingestion is not a normal route of exposure for gases

Potential chronic health

effects

: CARCINOGENIC EFFECTS Not available.

MUTAGENIC EFFECTS Not available.

TERATOGENIC EFFECTS: Not available.

Medical conditions : Acute or chronic respiratory conditions may be aggravated by overexposure to this gas.

aggravated by overexposure

See toxicological Information (section 11)

Section 4. First aid measures

No action shall be taken involving any personal risk or without suitable training. If fumes are still suspected to be present, the rescuer should wear an appropriate mask or a self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

Eye contact : In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention if irritation occurs.

Build 1.1 Page: 1/6

Acetylene

Skin contact

: In case of contact, immediately flush skin with plenty of water. Remove contaminated clothing and shoes. Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention.

Frostbite

Try to warm up the frozen tissues and seek medical attention.

Inhalation

: If inhaled, remove to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. Get medical attention.

Ingestion

Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention if symptoms appear.

Section 5. Fire fighting measures

Flammability of the product: Flammable.

Auto-ignition temperature

: 304.85°C (580.7°F)

Flash point

: Closed cup: -18.15°C (-0.7°F).

Flammable limits

: Lower: 2.5% Upper: 82%

Fire hazards in presence of : Extremely flammable in presence of open flames, sparks and static discharge, of heat,

Products of combustion

: These products are carbon oxides (CO, CO₂).

various substances

Explosion hazards in presence of various

of oxidizing materials.

substances

: Explosive in presence of heat.

Fire fighting media and instructions

: In case of fire, use water spray (fog), foam, dry chemicals, or CO₂.

If involved in fire, shut off flow immediately if it can be done without risk. Apply water from a safe distance to cool container and protect surrounding area.

Extremely flammable. Gas may accumulate in confined areas, travel considerable distance to source of ignition and flash back causing fire or explosion.

Special protective equipment for fire-fighters Fire fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full facepiece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions

Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment (Section 8). Shut off gas supply if this can be done safely. Isolate area until gas has dispersed.

Environmental precautions

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 7. Handling and storage

Handling

: Keep container closed. Use only with adequate ventilation. Keep away from heat, sparks and flame. To avoid fire, minimize ignition sources. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Do not puncture or incinerate container. High pressure gas. Use equipment rated for cylinder pressure. Close valve after each use and when empty. Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement.

Storage

Keep container tightly closed. Keep container in a cool, well-ventilated area. Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 52 °C (125 °F).

Build 1.1 Page: 2/6

Section 8. Exposure Controls, Personal Protection

Engineering controls

: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. The engineering controls also need to keep gas, vapor or dust concentrations below any explosive limits. Use explosion-proof ventilation equipment.

Personal protection

Eyes

: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or

Skin

: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory

: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

The applicable standards are (US) 29 CFR 1910.134 and (Canada) Z94.4-93

Hands

: Chemical-resistant, impervious gloves or gauntlets complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

of a large spill

Personal protection in case: A self-contained breathing apparatus should be used to avoid inhalation of the product.

Consult local authorities for acceptable exposure limits.

Section 9. Physical and chemical properties

Molecular weight : 26.04 g/mole

: C2-H2 Molecular formula

Boiling/condensation point : Not available.

Melting/freezing point : Sublimation temperature: -81.8°C (-115.2°F)

: 35.3°C (95.5°F) Critical temperature

Vapor pressure : 635 psig **Vapor density** : 0.9 (Air = 1)Specific Volume (ft³/lb) : 14.7059 : 0.068 Gas Density (lb/ft³)

Physical chemical

: Not available.

comments

Section 10. Stability and reactivity

Stability and reactivity

: The product may undergo hazardous decomposition, condensation or polymerization, it may react violently with water to emit toxic gases or it may become self-reactive under conditions of shock or increase in temperature or pressure.

Incompatibility with various: Extremely reactive or incompatible with oxidizing agents

substances

Section 11. Toxicological information

Chronic effects on humans : Causes damage to the following organs: upper respiratory tract, central nervous system (CNS).

Other toxic effects on humans

: No specific information is available in our database regarding the other toxic effects of this material for humans.

Specific effects

: No known significant effects or critical hazards. **Carcinogenic effects** : No known significant effects or critical hazards. **Mutagenic effects**

Build 1.1 Page: 3/6 Acetylene

Reproduction toxicity: No known significant effects or critical hazards.

Section 12. Ecological information

Products of degradation: These products are carbon oxides (CO, CO₂) and water.

Toxicity of the products of

: The product itself and its products of degradation are not toxic.

biodegradation

Environmental fate : Not available.

Environmental hazards: No known significant effects or critical hazards.

Toxicity to the environment : Not available.

Section 13. Disposal considerations

Product removed from the cylinder must be disposed of in accordance with appropriate Federal, State, local regulation.Return cylinders with residual product to Airgas, Inc.Do not dispose of locally.

Section 14. Transport information
